

# MUHAMMAD HASSAN

## FULL-STACK WEBSITE DEVELOPER

Faisalabad, Pakistan | [webdevbyhassan@gmail.com](mailto:webdevbyhassan@gmail.com) | <https://webdevbyhassan.vercel.app>

---

### SUMMARY

---

Practical Web Developer with Significant Experience in Full-Stack Development. I have worked with various clients, ensuring a user-focused approach to my work, using my MERN and Next.js expertise to build scalable web apps and deliver tailored digital solutions.

### PROFESSIONAL EXPERIENCE

---

**DeepAuras (USA) - Full Stack Developer** Aug 2025 - Present

- Working remotely with US team on MERN applications for international clients.
- Delivering scalable features and gaining professional global industry experience.

**Edify College of IT - Next.js Developer** Feb 2025 - July 2025

- Built LMS, AI Study Assistant, and ERP dashboard using Next.js and MongoDB.
- Worked on UI, authentication, APIs, and media handling with Cloudinary.

**ITzone.uk - MERN stack developer** Oct 2024 - Feb 2025

- Built responsive interfaces using React and Tailwind CSS for client projects.
- Developed backend APIs using Node.js and MongoDB with proper deployment.

### PROJECTS

---

**Calm Circle E-commerce – Next.js** <https://calmcircle.co.uk>

Built luxury fashion e-commerce platform in Next.js with product catalog, cart, checkout, payments, admin panel, and secure authentication system.

**Breakin Barriers Charity – Next.js** <https://breakinbarriers.co.uk>

Built charity platform with donation system, e-commerce shop, blog, galleries, services, and community features for social support.

**Educational ERP Dashboard** [Educational-ERP-Dashboard](#)

Built ERP system in Next.js for institutes with accounting, HR, roles, reports, dashboards, user management, and complete academic operations.

### SKILLS
